CAREER OBJECTIVE

To build systems that are as thoughtful as they are functional — applying growing skills in web, mobile and systems development toward a reputed organization where he can contribute effectively, keep learning, and grow professionally.

PROJECTS — sole developer on all three; live demos at karveyportfolio.vercel.app

Barangay Safety

Capstone Project · 2026 · Ongoing

Incident reporting with geo-tagging and live maps for high-density barangays in Lipa City.

- **Geo-tagged reports.** Residents file a report in a few taps — category, photo or video, and their GPS location dropped on a map.
- **Auto-escalation.** An unanswered report escalates at 5, 10 and 15 minutes, widening who gets alerted each time.
- **"I'm responding".** A Captain, Secretary or tanod can claim a report in one tap; the resident is told help is on the way and the response clock stops.

Flutter · Dart · Supabase · PostgreSQL · Row-Level Security · pg_cron · Edge Functions · Firebase Cloud Messaging · OpenStreetMap · Geolocator · Provider · fl_chart

GMD Bakery Planner

Client Commission · 2026 · Delivered

An order and production planner for GMD Bakery — home of the special Mamon de Tabla since 1986.

- **Orders in seconds.** Pick a product and the price fills itself in.
- **The baker's to-do list.** For any date, the production plan shows how many pieces are needed, how many are already in stock, and how many are still to bake — with a printable bake sheet.
- **Inventory that adds up.** Record what was baked or wasted; stock is calculated from baking records minus completed orders, with one-click undo.

Python · Tkinter · Matplotlib · Pillow · CSV · PyInstaller

Failed Delivery Analyzer

Client Commission · 2026 · Delivered

Finds out why deliveries fail, which areas struggle, and which parcels needed a second trip.

- **Attempt-level records.** Every delivery attempt is its own record.
- **Rules that keep data honest.** A successful attempt cannot have a failure reason, a failed one must have one, and a delivery that already succeeded cannot get more attempts.
- **Failure analysis.** Counts every failure reason and surfaces the most common one, so the team knows what to fix first.

Python · Tkinter · Matplotlib · CSV · PyInstaller · Automated tests

EDUCATION

De La Salle Lipa

2023 – 2027

Bachelor of Science in Information Technology — currently 4th year

San Guillermo Academy

2021 – 2023

Senior High School

SKILLS

Mobile & Web	Flutter, Dart, UI/UX design, responsive web
Backend & Data	Supabase, PostgreSQL, SQL, row-level security, Node.js, REST APIs
Desktop & Analytics	Python, Tkinter, Matplotlib, Power BI, UiPath
Foundations	C++, software architecture, automated testing, Adobe tools

CERTIFICATIONS

- ✓ Cyber Threat Management — Cisco Networking Academy (April 2026)
- ✓ Python Essentials 2 — Cisco × OpenEDG Python Institute (April 2026)
- ✓ Python Essentials 1 — Cisco × OpenEDG Python Institute (April 2026)
- ✓ Skills to Succeed Academy, 58 modules — Accenture (March 2026)
- ✓ DevRoutes: Learning How to Learn with Roadmaps — JPCS, De La Salle chapter (January 2026)

STRENGTHS

Quick learner · Team player · Detail-oriented · Creative problem solver
